

Fixed Shorts

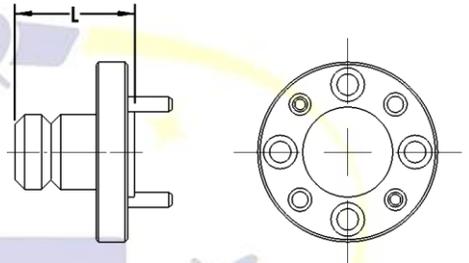

Summary:

Our Fixed Shorts are manufactured to provide the smoothest, most level surface possible for reflecting energy in a waveguide system. These shorts are ideally suited as calibration components for Vector Network Analyzers. We supply Fixed Shorts in four sizes that fit with our WR3 to WR42 flanges. In addition to the models listed, Shorts with different lengths can be supplied on special order.

Ordering Example:

FS875S is a Fixed Short with a square 0.875" flange.

Specifications			
Part Name	WR	Length (in)	Flange
FS875S	42	1.00	S 0.875
FS750S	28	1.00	S 0.750
FS1125R	22 -19	0.50	R 1.125
FS750R	15 - 3	0.50	R 0.750
